

We believe when the world tells you there is no path forward,
you can create your own.

We believe everyone deserves an environment that enables them to do *more than merely survive*. We believe every human being has *purpose*. We believe *no one is beyond repair*. We believe everyone is capable of *deep, vigorous growth*.

We believe everyone is worthy of bold, extravagant *love*.

We believe in *science*. We believe science cannot reach its full potential when it is not paired with love.

We believe in the union
of *science and love*.

We believe that individuals with neurobiological delays, disorders, and challenges have much to contribute to the world; *they are worthy of being seen*.

We believe in equipping and empowering caretakers; they are also *worthy of being seen*.

We believe *hope is alive*.

We believe that lasting transformation is *possible*.

We believe that everyone
should be *free to flourish*.
